

Get a clear way forward to effective ergonomics in the workplace

Our strategy focuses on continuous improvement through innovative technology, ongoing support, training, and regular follow-ups. We provide customized workstation adjustments and resources designed to meet ergonomic needs.

Our Ergonomics Approach

PERFORMANCE ASSESSMENT

This can be achieved through a loss control visit, a self-assessment utilizing our training materials, or by employing cutting edge video analysis tools.

IDENTIFY HIGH RISK JOB PERFORMANCES

Automated tools aid in identifying risks associated with joint positioning, repetitive movements, lifting techniques, and the duration of tasks.

IMPLEMENT ERGONOMIC SOLUTIONS

Recommendations focus on mitigating injury risks through equipment adjustments and workstation modifications, supported by our resources.

ENHANCE OVERALL PROCESS

Implementing a risk prevention strategy standardizes assessments, uncovers trends, and fosters collaboration, promoting a proactive safety culture.

Ergonomic injuries are the most common type of workplace incidents, accounting for a substantial portion of all non-fatal injuries. By identifying and addressing these risks, we can reduce claims and foster a safer, healthier work environment.
